

Behavior Based Safety

நடத்தை தவிர்க்கும் விபத்தை

(One Day Workshop)

Behavioral Safety targets specific unsafe behaviors. Another reason for the success of Behavioral Safety is its focus on that 'small proportion of unsafe behaviors that are responsible for the lion's share of a company's safety incidents'. Most Behavioral Safety practitioners utilise Applied Behavioral Analytic techniques to identify the workplace factors that drive or trigger particular unsafe behaviors and the consequences to the person for engaging in these unsafe behaviors. Some also identify the associated management system faults so that they can be addressed in order to stop them triggering unsafe behaviors. The golden rules for these behaviors are [1] that they are directly observable: i.e. anybody can see them as they occur; and [2] are within people's control (i.e. everything is in place so that people can behave safely). These can be embedded in mind if we focus on the following 5 basic aspects:

மனப்பாங்கு	Attitude
உணர்வுகளை கையாள்வது	Emotional Intelligence
மாற்றத்தை ஏற்றுக்கொள்வது	Change Management
கட்டுப்பாடு	Discipline
கடமையுணர்ச்சி	Responsibility

We will engage the participants through case studies of real time factory incidents, relevant clippings, powerful power-point, team exercise, games & activities.

Organized by – Quantum Leap Academy – Chennai's leading training agency - trained thousands of people on Spoken English, Soft skills & Technical Skills for companies like Schwing Stetter, Hyundai, Salcomp, JK Tyre, Apollo Tyre, MRF Tyre, ATG Tyre, UCAL, Nippon Express (Nittsu Logistics), Asian Paints, Igarashi Motors, Gates Unitta, TVS Sundaram Industries, Turbo Energy Limited, Sundram Fasteners, Sundram Brake Lining, Greaves Cotton, Wonjin Autoparts, Mando, Sodecia, Convenio Food, Nokia, TVS Rubber, ATV Manufacturing, Venu Engineering, MATE, Shanmuga Precision Forging, Scigenics, SFA Tech.
